

MEDICAL SCIENCE SUMMER PROJECT

Part 1:

Complete the independent task set in July - which was to...

Have a look at the video playlist from NHS Careers:

<https://www.youtube.com/@HealthCareers/videos>

Decide on some job roles you could see yourself working in and watch a video on what is entailed in a typical life of a person doing that role.

Using Unifrog, make a shortlist of courses and see what sort of grades are needed - for A-Levels and also BTEC (and if BTEC is something they accept).

Extra credit if you complete some MOOCs.

Be ready to share in September.

Part 2:

Read the following article that discusses the importance of health literacy and challenges to communicating with the general public:

<https://evidence.nihr.ac.uk/collection/health-information-are-you-getting-your-message-across/>

Summarise this in your own report which should contain:

- What the main challenges faced by health communicators
- What consequences are if information is misinterpreted or not understood
- How to improve communication
- Benefits of improved health communication
- Reference any other articles you have found that support or develop the points above

Have this ready to be handed in in September.
